EDUCATION

- HIGH SCHOOL DIPLOMA
PHILIPPINE SCIENCE
HIGH SCHOOL
SOCCSKSARGEN
REGION CAMPUS,
KORONADAL CITY
2023
- BACHELOR OF SCIENCE
IN COMPUTER SCIENCE
(CURRENTLY TAKING)
UNIVERSITY OF THE
PHILIPPINES
MINDANAO, DAVAO
CITY

ORGANIZATIONS

- SOCIETY OF
PROGRAMMERS AND
REFINED COMPUTER
SCIENTISTS
Member since 2024
- AWS LEARNING CLUB -
UP MINDANAO
Member since 2025

SKILLS

Next.js, Amazon Web Services,
Docker, Github Actions, JavaScript,
Typescript, React, HTML, CSS
(Native, Bootstrap, Tailwind),
Python, PHP, SQL, C++, C, C#, Git,
Supabase, Jest, Playwright, Zod,
Momento, Storybook, Golang,
Svelte

CERTIFICATIONS

SUMMARY

- Detail-oriented Full Stack Developer with proven expertise in designing and deploying robust, scalable web applications. Proficient in modern JavaScript frameworks, RESTful API development, and cloud-based solutions. Demonstrated success in refactoring legacy codebases, enforcing best practices and standardizing project documentation to enhance collaboration and maintainability. Adept at delivering high-quality technical solutions that drive operational efficiency and improve user experiences across multiple platforms.

PROJECTS

- ONLINE COVID-19 CONTACT TRACING SYSTEM (CCTS) WITH
FACIAL RECOGNITION
Senior High School Research Paper. Sole Developer
HTML, CSS, JQuery, AJAX, PHP, MySQL
- UNIVERSITY BUY-AND-SELL PLATFORM IMPLEMENTED WITH AN
SQL DATABASE
University Course Requirement. Sole Developer
HTML, BootstrapCSS, JQuery, AJAX, PHP, MySQL
- SPARCS TECH-TIX EVENT TICKETING PLATFORM
University organization (SPARCS) project for online event ticketing. Minor Backend Role dealing with Code Modifications and Standardization:

Implemented the Single Responsibility Principle (SRP). Extracted and refactored functionality across the codebase, ensuring each function had a single purpose and preventing future technical debt.

Overhauled and standardized docstrings for every function, promoting clarity, consistency, and ease of onboarding for new contributors.
Serverless Framework, AWS Lambda, Python, FastAPI, Vite, React, Typescript, Shadcn/ui
[Github Repository](#)
- COLLEGE ROOM MANAGEMENT SYSTEM
University Course Requirement. Aims to streamline and to digitalize the process of reserving rooms for class or events at the College of Science and Mathematics in the University of the Philippines Mindanao Campus. Full Stack Developer:

Tackled core authentication, middleware, and session management challenges to deliver a secure and seamless user experience.

Spearheaded frontend development—resolving layout breakpoints, centralizing component folders, and unifying route-based CSS to enhance consistency across the platform.

Streamlined environment variable handling and validation (.env), and introduced a CI/CD Pipeline to enforce code consistency with ESLint and Prettier—significantly reducing development friction

Spearheaded the development of robust, scalable backend APIs that underpin multiple pages, ensuring rapid data delivery and seamless integration with front-end systems.

Orchestrated most of the configuration of Supabase, creating a robust, real-time backend that efficiently supports a dynamic web environment
Next.js, React, TailwindCSS, Typescript, Radix, Shadcn/ui, Momento, V-Test, React Testing Library, Playwright, Zod, Sentry, Storybook, Supabase, AWS Amplify, AWS S3, ESLint, Prettier, Github Actions, Posthog

PREVIOUS WORK EXPERIENCE

- SOFTWARE ENGINEER - HIBI (JUNE 2025 - PRESENT)
 - Implemented end-to-end authentication using Amazon Cognito with Google OAuth 2.0, JWT validation, and secure token handling across frontend and backend.
 - Designed and built RESTful Lambda handlers in Go following hexagonal (clean) architecture, separating domain logic from adapters for repositories, handlers, and external providers.
 - Contributed to the serverless infrastructure using AWS CDK (TypeScript), including API Gateway routes, DynamoDB tables, and IAM policies scoped to least-privilege access.
 - Collaborated on frontend-backend integration for a Next.js PWA, ensuring seamless auth flows and API consumption with proper error handling and type-safe contracts.
 - Next.js, Typescript, TailwindCSS, Postman, Amazon Web Services, Go, ESLint, Github Actions, Shadcn/ui
